

Mouse Monoclonal Antibody to HIV-1 Reverse Transcriptase

ABL, INC.

IgG is purified by affinity chromatography on Protein A Sepharose

Catalog Number: 4315

Quantity:	100 µg
Isotype:	IgG1
Immunogen:	Solubilized HIV-1 _{III} B viral proteins
Reactivity:	<ul style="list-style-type: none">• Reacts with HIV-1_{III}B reverse transcriptase in immunoblots (both p66/p51)• Use 5 micrograms per assay.

Reference(s): Veronese, F.D., Copeland, T.D., DeVico, A.L., Rahman, R., Oroszlan, S., Gallo, R.C., and Sarngadharan, M.G. Characterization of highly immunogenic p66/p51 as the reverse transcriptase of HTLV-III/LAV. *Science* 231:1289-1291, 1986.

* Determined using BCA Protein Assay (Pierce Biotechnology, Inc., Rockford, IL). ABL does not guarantee equivalent protein concentration results with other assay methods.

This product does not contain sodium azide.
