

SIV_{mac251} gp120

ABL, INC.

Catalog Number:	5428
Quantity:	95 µg
Source:	Conditioned medium of SIV _{mac251} infected HUT78 cells. SIV _{mac251} was purified by immunoaffinity chromatography using a mouse monoclonal antibody to SIV _{mac251} gp120 and reversed phase chromatography.
Inactivation Procedure:	Triton X-100 was added to the conditioned medium to a final concentration of 0.5%. This treatment has been shown to completely inactivate SIV.
Purity:	More than 95% pure by SDS-PAGE. This preparation is free of endotoxin.
Storage:	Store at -70°C
