ABL has an exceptional history in the development and GMP production of viral-based biologics. With facilities in the U.S. and Europe, ABL offers a comprehensive portfolio of services for the effective design, development, production and testing of vaccines, gene therapies and oncolytic candidates.

Manufacturing Capabilities
- Roller Bottles, Cell Factories, Flasks
- Single-Use Disposable Bioreactor System
- Chromatography-Based Purification
- Aseptic Fill/Finish up to 10,000 Vials per lot

Support Services
- Process Development
- Analytical Development & Qualification
- Quality Assurance
- Regulatory Affairs

Fully Integrated Project Management
- Project Team Leadership
- Budget and Schedule Tracking
- Third Party Vendor Management as Needed

Experience
- AAV, Adenovirus, MVA, VSV, Lentivirus, HIV, and Others
- DNA and RNA Viruses
- Enveloped and Non-Enveloped Viruses
- Lytic and Non-Lytic Viruses

Manufacturing Services
- Process Development
- Analytical Method Development & Qualification
- cGMP Cell Banking (Host Cell & Packaging Lines)
- cGMP Virus Banking
- cGMP Bulk Virus Production
- Aseptic Fill/Finish (Liquid Fills)

Don’t let your product development program hit the wall
Break through the challenges of biomanufacturing with ABL

- cGMP API Manufacturing
- Cell Banking
- Process Development and Scale Up
- Aseptic Filling

Building on our 25 years of biologics experience, ABL has recently expanded into Europe with a 1,500m² GMP facility dedicated to producing virus products. Located in Strasbourg, France, the facility maintains bulk production suites for adherent and bioreactor-based platforms, as well as an isolator-based fill line with a capacity for 10,000 vials per lot.

HIGHLIGHTS
- Bioreactor and adherent processing
- Experience with many types of vectors and vaccine types
- 25 years of experience producing viral lysates for commercial diagnostic products
- Prime contractor for U.S. government vaccine development programs
